

# vGIS UTILITIES ADMINISTRATOR QUICK-START GUIDE

vGIS Portal is a web-based self-service portal designed to help administrators manage and configure their companies' vGIS systems.

The portal gives administrators oversight of several elements essential to operating vGIS.

vGIS Portal is incredibly easy to learn and use. We've put together a plan to get you up and running in no time.

Please follow this step-by-step guide to learn everything there is to learn about vGIS Portal at your own pace.

Have questions? Let us know – [support@vGIS.io](mailto:support@vGIS.io) or [@vGIS Map](#).

## Step 1

Review the vGIS Portal summary and learn how to request vGIS Portal access by visiting <http://bit.ly/2HQQ2hy>.

## Step 2

Once you have accessed vGIS Portal, you are ready to manage your company. This tutorial provides a condensed overview of all vGIS Portal features: <http://bit.ly/2ZdmQHF>.

## Step 3

Data source mapping is the key to vGIS visuals. This tutorial provides step-by-step instructions for managing data sources within vGIS: <http://bit.ly/2wyosPL>.

## Documentation

Looking for more information about vGIS Portal? Follow this link to find the answers you need: <http://bit.ly/2QUBnoJ>.

**Note:** Some documentation links will require you to register with the vGIS Support Center. Please allow up to 48 hours for a registration review.
